

## **Job Title: FullStack Developer**

**Location:** Gurugram, Haryana

**Company:** Athena Executive Search & Consulting

**About Us:** Athena Executive Search & Consulting is a boutique retained search firm delivering high-quality Executive Search, Board Level Advisory, and Talent Management Consulting services to clients. We specialize in finding transformational leaders who drive growth, combining global best practices with a personalized approach. As a member of the Association of Executive Search Consultants (AESC), we maintain the highest professional standards in retained executive search consulting.

**Role Overview:** We are looking for a skilled **Full Stack Developer** who will be responsible for designing, developing, and maintaining both frontend and backend components of scalable web applications. You will work closely with cross-functional teams to build seamless, high-performance digital solutions, ensuring a smooth user experience while optimizing application logic, databases, and APIs. This role requires proficiency in modern frontend frameworks, backend technologies, database management, and cloud-based deployments, making you a key contributor to the end-to-end development lifecycle.

### **Key Responsibilities:**

- Develop responsive, user-friendly, and visually appealing web applications using modern frontend technologies.
- Collaborate with designers, backend developers, and product managers to create seamless user experiences.
- Optimize applications for maximum speed and scalability.
- Ensure cross-browser and cross-platform compatibility.

- Implement UI/UX designs with precision and attention to detail.
- Write clean, maintainable, and efficient code following industry best practices.
- Debug and troubleshoot frontend issues to improve performance and usability.
- Stay up to date with the latest trends and technologies in frontend development.

#### **Required Skills & Qualifications:**

- Proficiency in **HTML, CSS, JavaScript, and modern frameworks like React, Angular, or Vue.js.**
- Experience with **CSS preprocessors** (SASS, LESS) and frontend build tools (Webpack, Babel).
- Strong understanding of **RESTful APIs and asynchronous request handling.**
- Knowledge of **state management libraries** (Redux, Context API, Vuex, etc.).
- Familiarity with **version control systems** like Git.
- Experience in **unit testing** and debugging frontend applications.
- Understanding of **SEO principles and web accessibility standards.**
- Ability to work in an **agile development environment.**

#### **Nice-to-Have:**

- Experience with **TypeScript.**
- Knowledge of **GraphQL** and headless CMS.
- Exposure to backend development with **Node.js.**
- Understanding of UI/UX design principles and tools like Figma, Sketch, or Adobe XD.

#### **Education:**

- Bachelor's degree in **Computer Science, Engineering, or a related field** (or equivalent experience).

#### **What We Offer:**

- Be part of a dynamic and forward-thinking executive search firm that fosters collaboration, growth, and continuous learning.

- Work closely with top-tier organizations, providing strategic talent solutions and gaining deep insights into leadership hiring and talent management.
- Enjoy a rewarding package that reflects your expertise and contribution, along with comprehensive benefits to support your well-being.
- Access best-in-class tools, technologies, and methodologies that are shaping the future of executive search, empowering you to deliver exceptional results for clients.

**Application Process:** Interested candidates are encouraged to apply by sending their resume and a cover letter detailing their relevant experience to [manuraaj@aesc.co.in](mailto:manuraaj@aesc.co.in)
